CLEAR VIEW® CAP KIT

Instructions for MT Dual Port Series

- Remove OEM cap retaining the washers, discard old bolts.
 - Allow oil to completely drain.
 - Remove any old gasket material from face of roller and idler hubs.
 - Using the enclosed replacement bolts & your OEM washers, place the Kile® Clear View® caps, with gaskets, to the hub.
 - Tighten bolts to 35-40 inch pounds. Do not over tighten bolts.
 - Replace oil to manufacture specifications.
 - Tighten plugs with plug wrench.
- Use only soap and water to clean caps, no solvents (solvents can cause clouding and premature failure of caps. Solvent use will void warranty)*

Do not over tighten bolts
